MEMORANDUM

TO:	File	REF. NO.:	002012
FROM:	Jennifer McKinnon	DATE:	December 29, 2008
CC:	Sarah Illi; CRA		
RE:	**2008 Annual Monitoring Well Sampling Event Highway 96 Site - Whitebear Township, MN**		

Ryan Coy and Jennifer McKinnon conducted the 2008 annual monitoring well sampling event at the Highway 96 Site (Site) from October 6-13, 2008. Additionally, the extraction system (EW-1A, EW-2, and the Sump) was sampled by Jennifer McKinnon on October 13, 2008. Sampling was conducted in accordance with CRA's "Annual Monitoring Well Sampling Event" letter, which was submitted to the Minnesota Pollution Control Agency (MPCA) on September 22, 2008.

On October 6, 2008, water levels were measured at each monitoring well, the four converted residential monitoring wells and the two active residential monitoring wells, prior to sampling. The groundwater elevations for 2008 are summarized in Table 1.

The October 2008 annual monitoring well sampling event is summarized in Table 2. Low-flow purging records are included in Attachment A.

Each monitoring location was sampled for analysis of VOCs and chloride. EW-1A, EW-2, and the Sump were additionally sampled for analysis of pH, TSS, and COD. VOC samples collected from the off-Site monitoring locations (MW-17A, MW-17B, MW-17L, MW-18A, MW-18B, MW-18L, MW-19A, MW-19B, MW-19L, MW-20B, MW-21A, EW-3, and the four converted residential monitoring wells) were sent to the Minnesota Department of Health (MDH) Environmental Laboratory for low level vinyl chloride and VOC analysis by Methods 460 and 468. All other VOC samples and all chloride samples were sent to Test America Laboratories in North Canton, Ohio for analysis by methods 8260B (VOCs) and 300.0A (chloride).

Three duplicates, three rinsate blanks, and two matrix spike/matrix duplicate sample sets were collected to fulfill QA/QC requirements.

The appropriate equipment requisition forms and field data record forms were completed and filed accordingly.

DUP - Duplicate
NM - Not Measured
NR - Not Recorded

APPENDIX D

HISTORICAL DATA SUMMARY

APPENDIX D

FOOTNOTES
APPENDIX D.1 D.2, and D.3

Notes:

SCG - Site Clean-up Goal. SCGs apply to on-Site monitoring wells and compliance wells in the Lower Sand and St. Peter Sandstone aquifers, only. Shaded/bolded results in Appendix C.1 and Appendix C.2 exceeded their respective SCGs.

MN HRL - Minnesota Department of Health - Health Risk Limit. HRLs apply to residential wells only (not converted residential monitoring wells). Shaded/bolded results in Appendix C.3 exceeded their respective HRLs.

J - Estimated. Result below Reporting Limit.

U - Result not present at or above the associated value.

UJ - Estimated Reporting Limit.

C - Result is estimated due to coelution.

NA - Not Analyzed

RE - Rejected Reporting Limit

SIC - Suspected Laboratory Instrument Carry-over.

PP - Peak Present

D - Duplicate

L - Split sample submitted to separate laboratory.

M - Subsequent analysis due to coelution.

R - Re-analysis
