RE: Highway 96 Dump Superfund Site
Feasibility Study, July 27, 2007

Dear Mr. Frehner:

On July 27, 2007, the Minnesota Pollution Control Agency (MPCA) received the Feasibility Study (FS) report for the Highway 96 Dump Site Superfund site (Site). This report was submitted by Conestoga-Rovers & Associates on behalf of Reynolds Metals Corporation and Whirlpool Corporation, the Responsible Parties (RPs) for the Site.

Within the next few weeks, the MPCA plans to send you comments on the FS report. Our response to the report may include comments from the City of North Oaks. We are expecting the City to send us its comments on the report by September 10, 2007. At that time we will review the City's comments and if appropriate, will include them in the Agency's response.

If you have any further questions in this matter, please feel free to call Nile Fellows at 651-296-7299 or Fred Campbell at 651-296-7267.

Sincerely,

Doug Wetzstein, Supervisor
Superfund Unit 1
Superfund and Emergency Response Section
Remediation Division
